

FULL MEMBERS:

YOUR HYDRAULIC & FIRE DESIGN INDUSTRY PROFESSIONALS

All our full members have a minimum of six years experience as a hydraulic and / or fire services designer and hold a Diploma of Engineering - Hydraulic Services Design, Diploma of Engineering - Fire Services, Bachelor of Engineering or equivalent.

We consider our full members to have **recognised credentials** within the meaning of the National Construction Code for these disciplines.

Our full members can help you with the design and inspection of:

- > Cold water services
- > Heated water services
- > Non-drinking water services
- > Sanitary plumbing and drainage systems
- > Roof drainage systems
- > Surface and subsurface (stormwater) drainage systems
- > Trade waste & wastewater management systems
- > Natural gas & LPG services
- > Fire sprinkler systems
- > Fire hydrant systems
- > Fire hose reel systems & Portable fire extinguishers
- > Fire detection and alarm systems
- > Emergency warning and intercom systems (EWIS)
- > Gaseous fire suppression systems
- > Sustainable integrated water management

For further peace of mind we also have an active CPD system in which all members are encouraged to participate. To see a list of our CPD certified full members just head to our website.

Don't risk it! When having your next hydraulic and fire design completed, check and ensure they are an HCAA Full Member.
