Geberit SuperTube Technology

The Geberit SuperTube perfects interplay between three system components – Sovent, Bottom Turn Bend and BackFlip Bend.

This technology removes the requirement for parallel ventilation piping in residential apartments. To increase the liveable area in high rise buildings, all that is needed are three clever, space-saving fittings combined with a high load-bearing capacity discharge pipe.

To produce easy-to-use installation templates, this hydraulic innovation also integrates with Gerberit's performance solution.

Presenter: Matthew Lloyd, Geberit

General Meeting: Topic 1 - 10 min

Domestic Hot Water Plant Sizing

This dedicated domestic hot water presentation will outline and identify:

- Common methods of estimating domestic hot water over a peak hour
- Reasons we do not always use the PSD to size plant and when we do.

Presenter: Chris Portelli, Rheem

General Meeting: Topic 2 - 10 min

Water Demand Sub-committee

This update will cover the progress of the committee over the past year.

It will also present data currently being gathered in a Sydney residential building; future plans for the Water Demand Sub-committee and; details on how the industry can improve result quality.

Presenter: Jonathan Mousdell, WS&P
