CPD
EVENT

CPD Backflow Prevention

This CPD event is FREE informative training on backflow prevention between 5pm-6pm.

Zurn will explore the inner workings of backflow valves, what to look for when determining the difference, how testing is undertaken and what it verifies. Come and join the Zurn team as this topic will be for all levels of experience.

Presenter: Zurn

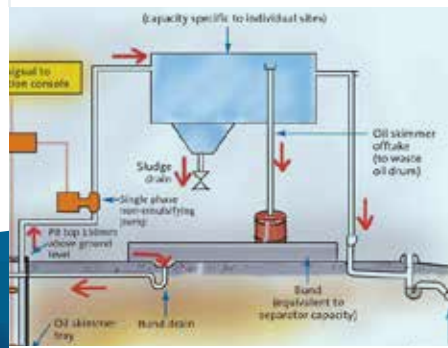

Hot Topic 1 - 10 min

Network Utility

This topic will address operators, backflow prevention & trade waste requirements including:

- what types of devices to install and where to place them
- device legislation and;
- a sneak at some possible changes to the requirements.

Presenter: James Milton
Sydney Water Corporation

Hot Topic 2 - 10 min

Air valves and sizing selection

This topic considers the important requirements for the design and installation of these devices. Changes to the DTS reference standard for heated water services within the 2019 PCA requires that air valves are installed at;

- a) the highest point or points of the circulatory piping;
- b) on the secondary flow adjacent to the water heater or bank of water heaters;
- c) in an accessible location; and
- d) with a connected drain delivering over a tundish

Presenter: Colin Kirkland of Bermad

Hot Topic 3 - 10 min

What is a H-box?

The H-box is the hottest thing to hit the heated water services market in recent times. It solves circulation issues within large metered apartments - but wait 'til you hear how!
